Atam

Legal Business Management System

Designed to be your partner in creating an organized, precise, and secure legal environment.

Atam's Vision

To be the most comprehensive legal platform for organizing work within law firms & legal departments, by automating consultations, tracking cases, & facilitating communication between the team and clients.

Why Atam?

Security & Privacy with Governance Standards

Precise permissions, advanced encryption, and compliance with legal policies.

Direct Integration with Official Legal Systems

Supports connection with national platforms such as Najiz, Moeen, Khibrah, & the Board of Grievances, ensuring electronic tracking of cases and legal transactions directly from within the system.

Comprehensive Administrative & Financial Integration

Supports integration with internal systems & links them to the relevant legal files.

Comprehensive Management of Files & Consultations

Complete documentation of all correspondence, meetings, and attachments in a single organized record.

Organization of Legal Tasks

A visual dashboard for distributing cases & tasks among lawyers & consultants.

Intelligence to Support Decision-Making

Real-time analytics & reports that reveal performance, workload, & level of completion

Atam has been designed to

To cover the entire legal workflow within your company, from the moment a request is received until the case is closed, through interconnected modules that provide a comprehensive view and full control over every detail.

Atam's Core Modules

01 Memos & Regulations

Prepare legal memos & regulations & save their final versions within the file, with the option to review and issue them in coordination between the team & supervisors.

02 Contracts

Manage the full contract lifecycle – from drafting to review & signing, with the ability to classify, archive, & link them to relevant cases or clients.

03 Tasks

Organize all cases and related tasks in a single clear dashboard, with the ability to assign responsibilities, track progress, and document every action taken on the case.

04 Requests

Manage incoming requests from clients or internal departments, with the ability to track the status of each request and easily convert it into a case or consultation when needed.

05

05 Enforcement

Track enforcement files step by step, recording decisions, notifications, & the progress of enforcement procedures with accuracy and transparency.

07 Scheduling & Follow-up

Schedule sessions, appointments, & legal tasks in a unified calendar, with smart reminders for important dates to avoid delays or scheduling conflicts.

06 Legal Consultations

Document & distribute consultations among the legal team, while saving correspondence & attachments & generating reports on the type & volume of consultations provided.

٦٦

Transforming the legal work environment
from routine to efficiency, from disorder to
precision, & from multiple scattered tools to
one comprehensive platform. ٩٩
